

Soft Tissue Biopsy Needles

MaxiCELL® biopsy needle harvests more aspiration for cytological evaluation.

- Harvests on both forward and backward thrusts of the needle, achieving a greater quantity of harvested cells.
- A 30 degree matched ground needle tip geometry helps harvest a cluster of intact cells.
- Each needle has numerically ordered centimetre markings on the outer cannula to facilitate depth placement.
- Available with an echogenic tip on the outer cannula to promote accurate placement under ultrasound guidance.
- Each needle has a unique, adjustable needle stop, which allows you to restrict forward movement, effectively localizing the needle tip to the biopsy site.

Soft Tissue Biopsy Needles: MaxiCELL™ Box of 10

MMC2202	22G (0.7 mm) x 5 cm
MMC2202US	22G (0.7 mm) x 5 cm, U/S
